- Start each bullet with a strong, past-tense action verb
- Having trouble coming up with content for your bullet points? Read these: link 1, link 2, link 3, link 4
- Each bullet point should be 1-2 lines long and max 1 sentence long. Use Quillbot, LanguageTool, and Hemingway Editor to help you paraphrase and shorten them
- Don't let bullets spill onto the next line with only 1–4 words on it, it's a huge waste of space

Projects

Project Title github.com/name/project

- The more work experience you have, the less relevant outside-work projects tend to become
- If you have something that really stands out, consider listing it here

Project Title project.com

- Only list real projects, not mandatory school projects or trivial tutorial projects found online
- Something that someone uses to solve a problem. Something that has users (can be just you, as long as you use it often) and is actively maintained and isn't just rotting in a GitHub repo, never to see a PR for the rest of its life.
